Mastering the balance beam is an important skill to learn in younger years. The wooden balance beam is a great bit of kit for younger children who will love to develop these skills in their playground.

Multiple balance beams can be arranged in series to create a zigzag around the playground. Great as part of a wooden outdoor obstacle course or trim trail, our balance beams can also be supplied to be installed at inclines and declines, adding a even more of a challenge.

The solid oak chemical free construction is highly durable and ideal for any nursery, school or playground. They can even be used as bench seating, or as zoning between classes.

**Guarantees**

Timber - 15 years

Fixings - 20 years
