

Playground Bridge

Product code BR.01

PLAYEQUIP

Dimensions LxWxH (m)
4.7 x 1 x 0.5

CFH - 0.5

Safety Surface Area - 0 sqm

The rubber playground bridge provides an exciting and challenging new material to playground bridges. This bridge can be made to be used between structures, or as part of a trim trail.

Our rubber playground bridges are made using 12mm recycled steel core rubber sheet, they are incredibly durable and eco friendly. Like no other playground bridge, and rubber bridge creates a slight bounce and wobble.

This brings another dimension to the balanced crossing where extra skill and patience is required.

Guarantees
