Our pull-up bar is designed for people who enjoy outdoor fitness. Exercise outdoors where the air is clean rather than being cooped up inside is always the best environment for your fitness routine. The pull up bar is the single most effective way of building upper body strength and core strength with exercises such as pull ups, leg raises and muscle ups.

The pull-up bars premium design utilises the most durable components including stainless steel, robinia and solid oak. It not only looks good but it's also extremely durable.
