Guarantees

Timber - 15 years

Fixings - 20 Years

The Roller Pixel Play Panel is a highly engaging and tactile play feature designed to encourage creativity, sensory exploration, and inclusive play. Featuring 63 individually rotating, two-tone rollers, children can turn the pixels to create patterns, shapes, and simple designs, making every interaction unique.

This simple yet stimulating panel is suitable for users of all abilities and is particularly beneficial for children with visual impairments, offering strong tactile and visual contrast. Designed with durability in mind, the Roller Pixel Play Panel is significantly stronger and more resistant to misuse than many alternatives on the market.

Manufactured from high-density polyethylene (HDPE), a material trusted within the play industry for its long lifespan and weather resistance, the panel also incorporates stainless steel pivot pins and fasteners, making it 100% recyclable and ideal for long-term outdoor installation.

The panel can be wall mounted using stand-off brackets or installed using oak posts for secure in-ground fixing, offering flexibility across a range of environments.
