Shoe Type

Steel Shoe / Bolt Down / Cast In Options
Please get in touch to discuss options.

Guarantees

Timber - 15 years

Fixings - 20 Years

Playground stumps can be used in many ways. They can be used as short simple seats for inside dens, or they can be used to link items of playground equipment together.

Our playground stumps are sold in units of 5. These stumps are de-barked and sanded smooth with all sharp edges removed. The average size of our stumps is around 280mm diameter and 600mm long. We advise that 300mm is used to bury leaving 300mm out of the ground.

We also supply stepping stumps that are much larger if required. Anything up to a diameter of 1200mm.
