Guarantees

Timber - 15 years

PlayEquip's high-quality playground logs bring nature into imaginative play, offering versatile elements for balancing, hopping, seating, den-building, or defining play zones. Crafted from sustainably sourced British sweet chestnut, these natural timber features blend seamlessly into outdoor environments while supporting eco-friendly design and responsible woodland management.

Chosen for its natural resistance to decay, sweet chestnut outperforms softer native timbers and oak, delivering long-lasting performance with minimal maintenance. Available in a range of sizes and finishes—shaped, de-barked, or natural, PlayEquip logs enhance sensory and physical development through authentic, tactile play experiences while providing a durable, low-maintenance solution for natural play spaces.
