Our classic wooden monkey bars will provide a great challenge to all ages whether being used for exercise or play. The most fun way to develop upper body strength and stamina outdoors. A fantastic piece of outdoor CrossFit equipment for adults and a great piece of playground equipment for kids.

Studies show that the development of upper body strength brings great benefits for school kids, by improving posture and subsequently improving concentration in the classroom. Take a look at our [blog post](#) about the benefits that monkey bars can bring to both adults and kids.

The solid oak and stainless steel components make these monkey bars durable, solid and beautiful to look at. We use the highest quality materials for our monkey bars which are crafted by highly skilled carpenters in our UK workshop. All corners and edges are chamfered round and smooth with 20mm radius, making them tactile and appealing.

The wooden monkey bars are specially designed for use on parks, school playgrounds and gardens. The wooden monkey bars are fully adaptable to any length and height you require so just let us know what you want and we'll make them for you.
