This versatile wooden climbing frame packs in as many play opportunities into one unit as possible.

Our custom play structure can be built and designed to your exact needs. This example includes a scramble net, tunnel, climbing ramp, ball run, sand pit, den area and firemen's pole.

Changes can be easily made to its size, amount of towers and play features.

Made from oak, larch, stainless steel and steel core rope, our wooden climbing frames are built to be durable, tactile and would be the perfect wooden climbing frame for any nursery, school, playground or garden.
